Advancing Net Zero Energy in the Philippines

Mario Lawrence C. Suelto

Philippine Green Building Council

9th Cleaner Energy Future Initiative
for ASEAN (CEFIA) Forum

22 April 2026

PHILIPPINE
GREEN BUILDING
COUNCIL

ESTABLISHED MEMBER

Supporting Development and Implementation

PHILGBC provides support in bridging policy, industry, and practice to transform regulations and standards into actual green buildings and net zero projects.

Policy development and implementation support

- Supporting policy development by connecting regulators, industry, and practitioners
- Supporting national and local governments in navigating regulations and providing guidance on compliance pathways and documentation requirements.
- Capacity-building for regulators and implementing agencies to enable consistent application of policies.

Capacity building and education

- Promoting net zero energy through PHILGBC-organized seminars, workshops, professional trainings, and conferences.
- Integrating education on environmental and building laws, regulations, and mandatory standards in training programs, including national policies on energy efficiency and conservation and renewable energy.

Beyond Compliance

PHILGBC promotes performance-based approaches and develops market incentives to improve adoption of green building and net zero principles in the country.

Certification

- Rating tools and certification incentivizes better energy performance.
- **BERDE** and **ANZ/PH** serves as a market catalyst based on local, climate-responsive strategies, and aligned with zero energy and low-carbon principles.

The logo for BERDE features the word "BERDE" in a bold, blue, sans-serif font. The letter "D" is stylized, with a green arrow pointing to the right, integrated into its shape.

BERDEonline.org

The logo for ANZPH features the word "ANZPH" in a bold, sans-serif font. The letters "ANZ" are blue, and "PH" are green. The letter "A" has a stylized blue and green graphic element on its left side.

Lessons

When owners commit early and set measurable energy targets, green building and net zero objectives translate more effectively into real performance.

Effective operations—not just design—determine long-term zero energy performance.

ANZ/PH Net Zero Energy

Lessons

Prioritizing energy efficiency strengthens the impact of renewable energy strategies.

Capacity-building and stakeholder engagement are as important as technology.
